Senior Frontend developer

Senior Frontend Engineer with around 5 years of experience building scalable, high-performance web applications using React, Next.js, TypeScript, GraphQL, and modern frontend architecture. Skilled in performance optimization, accessibility, AI integrations, SSR/SSG/ISR, React Server Components, and enterprise-grade UI development across Agile environments.

SKILLS

Frontend: CSS3, HTML5, JavaScript (ES6+), Next.js, React.js, SCSS, Tailwind CSS, TypeScript

Next.js & Rendering: App Router, Dynamic Routing, ISR, Nested Layouts, React Server Components, SEO Optimization, SSG, SSR

State Management: Context API, Redux, RxJS

Backend & APIs: Apollo Client, Express.js, GraphQL, Node.js, REST APIs

Performance & Architecture: Bundle Optimization, Caching Strategies, Code Splitting, Frontend Architecture, Lazy Loading, Performance Optimization, System Design

AI & Data: FAISS, Generative AI, Hugging Face, LangChain, LLM Integrations, NLP, RAG Systems, Semantic Search

Cloud & DevOps: AWS, CI/CD, Firebase, Jenkins, Netlify, Railway

Testing & Development: Accessibility (WCAG), Agile Methodologies, Git, Jest, Unit Testing

PROJECTS

NewsAlign — AI-Powered Fact Verification System 02/2026

Personal Project

- Built an AI-powered fact verification platform using React, Next.js, TypeScript, LangChain, FAISS, Hugging Face, NLP, and RAG pipelines.
- Reduced bundle size from 941KB to under 300KB using code splitting and frontend optimization techniques.
- Boosted Lighthouse score from 73→95 via SSR optimization, caching, and Core Web Vitals improvements.
- Implemented JWT authentication, API caching, and secure backend workflows for scalable performance.
- Achieved approximately 84% unit test coverage using Jest and modern testing practices.

reactli-c — React CLI Tool 01/2026

Personal Project

- Developed a CLI tool for generating reusable React component boilerplate templates.
- Improved developer productivity with zero runtime dependencies and simplified component scaffolding workflows.

Custom Reactive JavaScript Engine 08/2025

Personal Project

- Built a lightweight reactive state management engine inspired by React's useState internals.
- Demonstrated deep understanding of rendering cycles, reactivity systems, JavaScript memory handling, and frontend architecture principles.

WORK EXPERIENCE

Datapret **01/2024 - 03/2024**
MERN Stack Developer
Coop-based position

- Developed an accessibility-focused complaint resolution platform using React, Redux, TypeScript, Node.js, and REST APIs.
- Raised WCAG compliance by 30%; improved accessibility score and enabled inclusive user experience across workflows.
- Optimized frontend rendering, API integration, and data handling for improved responsiveness and scalability.
- Collaborated with Agile cross-functional teams to accelerate feature delivery and reduce rework cycles.
- Contract concluded upon successful project delivery.

Tata Consultancy Services (TCS) **01/2019 - 04/2023**
Senior Frontend Developer

- Led a team of 5 developers and drove frontend architecture decisions using React, Next.js, and TypeScript.
- Built scalable enterprise applications using React.js, Next.js, Redux, GraphQL, and REST APIs.
- Implemented Next.js App Router architecture with nested layouts, middleware, dynamic routing, and route groups.
- Worked extensively with SSR, SSG, ISR, and React Server Components to improve SEO and application performance.
- Cut API calls by 40% with RxJS; reduced latency and improved state management efficiency.
- Improved performance through code splitting, lazy loading, caching strategies, and bundle optimization.
- Partnered with backend teams on Spring Boot and GraphQL APIs; improved frontend integration efficiency and accelerated feature releases.
- Mentored 5 developers; enforced SOLID principles and clean architecture standards; streamlined code review cycles.
- Built WCAG-compliant responsive UI systems with cross-browser compatibility and zero accessibility violations during QA.

EDUCATION

Mobile Applications Development
Cambrian College • GPA: 3.8 Canada • 01/2023 - 01/2024

- Studied mobile UI patterns, frontend application development, and responsive interface design.
- Worked on modern JavaScript frameworks, cross-platform development concepts, and API integrations.

CERTIFICATIONS

Generative AI: Large Language Models
AI Engineering: RAG (LangChain, FAISS, Hugging Face)
NLP Programming
